

ATLANTIC SERIES 5000

ATLANTIC SERIES 5000

The OceanView Patio Door

It's the perfect balance: performance, reliability, elegance and longevity. Every detail has been considered in designing and manufacturing an elegant patio door with not just remarkable craftsmanship but true value. In its beauty. In the many new and unique features. In the ability to please today's demanding customers and their need for the pinnacle of architectural versatility. For those who seek the very best, and from OceanView to you, we present proudly the OceanView Patio Door Atlantic Series 5000.

Versatility

An unlimited number of multi panel configurations? Highly versatile? Customizable? Colours, upgrade hardware and premium features? Multi-chamber wood-bucked frame, variable jamb width, fixed panel support

converting to a slider track and universal H-mullion design? Frame profiles extending the wood-core's width to allow application with varying wall thickness (and different climates)? That's just the beginning.

Performance

It's our first, last and middle names. Some of the most skilled and experienced craftspeople make our products with such overwhelming pride. Extra chambers in the header... exceptional thermal and moisture barriers... Superior insulating characteristics... longer service life-cycle due to extra protection... Metal reinforced sashes and the highest quality handles, rollers, and hardware. Everyone at OceanView shares one and only one goal: providing customers with not only the highest quality, longest lasting, easy-to-use doors but also the most beautiful ones available anywhere.
